Make it **matter**

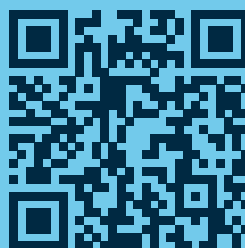

Sustainable entrepreneurship between generations and innovation

When you pick up a Schneider writing instrument, you are holding the result of many years of courage, passion, curiosity and experience: after “the excellent Schneider refill” became an absolute bestseller in the early 1950s, the grandfather of the present Schneider generation drove product development forward so that complete writing instruments could be totally manufactured in-house. His son internationalised the business and opened up global sales markets. Since 2008, Christian Schneider, the grandson of the company's founder, has been steering the fortunes of this traditional brand through times of great transformation—whether social, technological or economic. At the same time, entrepreneurial success has always gone hand in hand with a high sense of responsibility: towards the company, towards its employees, and towards treating nature and the environment with respect. This value-oriented corporate philosophy has been passed down from generation to generation and is now being carried into the future by siblings Christian Schneider and Martina Schneider under the motto #theschneiderway.

#theschneiderway

Sustainability is not a goal, but a journey. All company activities in this area are bundled under the motto #theschneiderway—from our internal attitude to our energy supply.
