Schneider fountain pen Wavy. A good choice from A to Z, also for the climate.

The four bright colours in blue, green, orange and pink are a highlight in any pencil case. Successfully learning to write is guaranteed with the pressure-resistant stainless steel nib with iridium tip A. Effortless, fluid and comfortable writing sensation makes writing fun.

The ergonomically rubberised grip profile supports the correct and fatigue-free writing position for beautiful handwriting. The non-slip, universal soft grip zone with the large finger areas prevents pressure points and is equally suitable for right- and left-handers.

The sturdy metal clip withstands the play instinct of children's hands. The standard ink cartridges fit for refilling, whereby the royal blue ink is erasable.

In order to place the right environmental topics with this young target group, the Wavy fountain pen is climate-neutral and manufactured with green electricity. With the purchase of this product, you also decide in favour of climate protection for plastic-free oceans.

Over 8 million tons of plastic waste end up in the ocean every year - one dump truck every minute. By 2050 there will be more plastic than fish in the oceans unless humans change their behaviour. Especially in developing countries, huge amounts of plastic waste are created by packaging and a lack of infrastructure to dispose of waste. This garbage accumulates on land and quickly reaches the sea via rivers and wind.

To prevent this, Schneider supports the [project offered by Climate Partner](#), whose approach is to exchange money for plastic. In Haiti, Indonesia and the Philippines, garbage collectors can earn their income this way. Everyone can collect plastic waste there and exchange it for money, food, drinking water, mobile phone credit, cooking oil or even school fees at the local Plastic Bank collection points. The exchanged value is higher than the actual market value of the plastic, so local people can really make a living from it.

As a result of this project, a lot of plastic does not even end up in the sea. It is recycled and processed into so-called social plastic, which becomes new products in the cycle - ecologically and socially compatible. ClimatePartner supports this project in combination with a Gold Standard climate protection project, an installation of photovoltaic solar modules in India, for an increasingly independent supply of clean electricity to the population: www.climatepartner.com/1429. With every ton of CO2 10 kg of plastic waste are compensated. The Wavy fountain pen is available in a cardboard box, on a blister with two cartridges or in a high-quality cardboard display with 20 pieces.
