The new Schneider promotional retractable ballpoint pen Skyton in many colours

Skyton combines design and sustainability with the graduated push button and tip. It is refillable for a long service life and is produced climate neutrally with green electricity. With its variety of 10 transparent and 6 opaque colours, the Skyton ballpoint pen offers a wide range of style options to broadly reflect personality and taste. With the ingenious Mix & Match principle, all colours of clip sleeve, upper part and tip can be combined with each other, making the Skyton wonderfully changeable into an individual and long-lasting advertising ambassador.

The minimum quantity is 1000 pieces, from 10,000 pieces Schneider even offers special barrel colours on request. Several printing areas are available for screen printing, pad printing or digital printing and offer ample space for sustainable advertising.

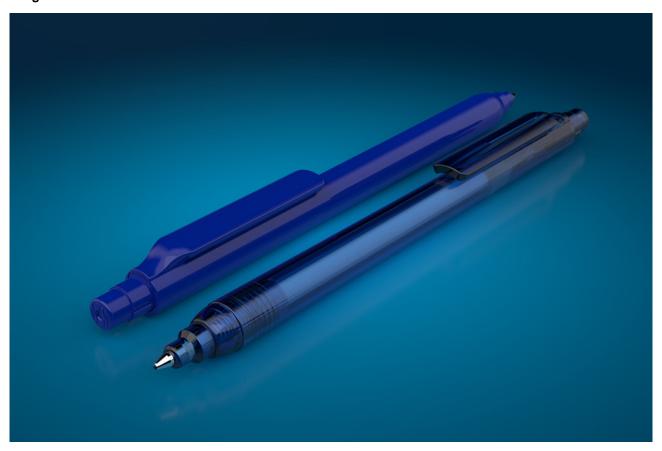

Like the product itself, the imprinting is also manufactured by Schneider in Germany. The product is of high quality, the materials are carefully selected. The original ballpoint pen is equipped with the popular Schneider refill 774 M.
